ALL THE BEST—Greenhouse Forcing “SNAPS”

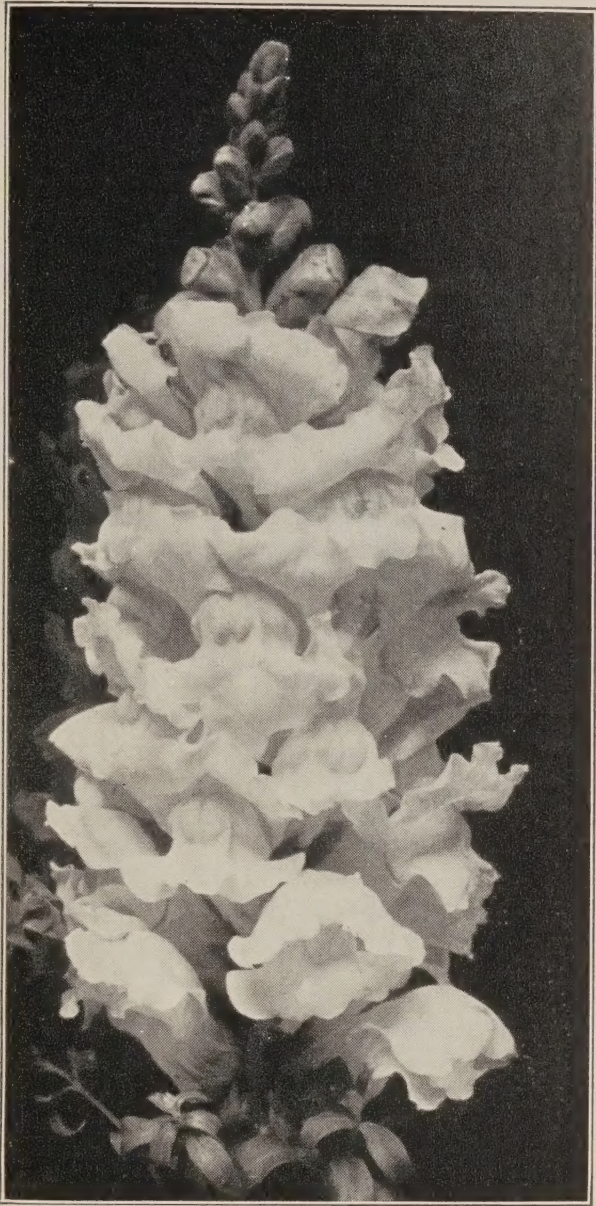

OUTDOOR SNAPS, listed page 4

The Rockwood strains offered here are known for their well-formed flowers, with large, closely set florets, heavy, wiry stems. Greenhouse produced seeds under ideal conditions. Ask for single stem culture pamphlet.

Special Note—Seed should be sown late June or July for Winter flowering in Northern States. Late July or early August in Southern States. High temperatures retard germination. Select a cool location for the seed flats where there is good air circulation. Water sparingly until seedlings are well established. We recommend using sterilized soil and it should not be fertilized. Dust seeds with Proliferol before sowing.

Larkspur

(Annuals) 8000 S

A January sowing of Larkspur will flower about May, depending on temperatures. While it is sown outdoors to advantage in the Fall, Spring sowings do about as well if sown the first day the ground can be prepared. To get best germination results in hot weather, chill the seeds in an ice box for several days before sowing. To draw up long-stemmed flowers use fairly enriched deep soil and water when quite dry.

Fleck's Sweet Peas

LATE, or SUMMER FLOWERING VARIETIES

The original strong growing class largely used for Summer flowering. Profitable for outdoor cuttings by sowing not later than February 1st, placing 3 or 4 seedlings in a 3-inch pot and after hardening them in an outdoor frame, planting them out. Space rows 3 feet, the pot plants spaced about 8 inches, but before doing so, syringe and fumigate very thoroughly, being sure they are clean of aphids. They should be sprayed for aphids every 2 weeks until they flower. Failures are frequently due to not watching this point. Usually reach a height of 4-5 feet and are supported with wire and string as indoors. Water should be applied when necessary. Flowers freely the last two weeks of June on. The new Spring flowering class are also well suited for outdoor growing.

FLECK'S FRESH SEEDS OF Perennials for Florists

INCLUDING POPULAR BIENNIALS

Every florist who has the available space should grow Perennials. Some are as easily raised as Annuals; quite a few may be forced; some make fine pot plants, and many furnish splendid cutting material. The rock garden requirements absorb all the low-growing varieties and the florist with his eye to the future will devote considerable space to Perennials of all kinds. They require little heat, if any, and not much care.

DELPHINIUM

10,000 S

Early Spring sowing will produce nice, large clumps by Fall for sales or greenhouse forcing. January sowing will produce flowers during Summer. July and August sowing and transplanting into the field during Fall will produce an early crop of fine large spikes.

Sow from January to September in flats. Use light, sandy soil, cover seed very slightly, keep moist and shaded until germination starts. Gradually give more light and fresh air, later transplant into flats and when large enough, harden off in full sun before planting out. Rich soil, good drainage and sunny location are essential.

NOTE—On important items, we have noted the approximate number of seeds per ounce which may be helpful in ordering. For example: **Acroclinium**—8600 S means 8600 seeds per ounce. However, this does not mean that you will get that many plants. Under favorable germinating conditions, most large seeds may germinate fifty to sixty per cent. A good many growers consider it best to order *at least* double the quantity of seeds for the plants they desire. It is good business to have more seedlings than needed, rather than to be short. The cost of seed is little compared to other considerations.

“Mum” Cuttings

From Disease Free Stock

FOR THE 1949 SEASON

We are offering Rooted and Unrooted Cuttings of varieties which will be available beginning January 1. We suggest that orders be placed early, as usual consideration for shipment shall be determined by the date order is received. When ordering please indicate earliest date you wish to receive shipment. Be specific.

TERMS OF SALE

- 1. The *minimum total order* that can be accepted is 500 cuttings.
- 2. *Fifty of each variety* is the *minimum* that can be supplied.
- 3. More than 50 of a variety must be in *multiples of 50*.
- 4. The minimum number of cuttings of a variety that can be supplied in unrooted cuttings is 250.
- 5. We allow a 4 per cent discount for cash with order, if order is placed before February 1st, or 2%, 10 days—60 days *net* after shipping.

SHIPPING INFORMATION

All our stock is shipped by Air Freight and Express COLLECT. All cuttings must be in perfect condition before being inspected and accepted by the Express Company. Therefore, if there is any damage enroute from being broken, heated or frozen, call your express agent to inspect the same, and get a “bad order” receipt as the condition of the package and amount of damage, etc. You must file claim, as our responsibility ceases when Express Company accepts shipment.

CHRYSANTHEMUM—Standard

SPECIAL NOTE—Orders for “Mum” cuttings should be placed with us by February 1st, otherwise we cannot give you the very best service as to deliveries on time. Our shippers advise placing 6 months a head. There will probably be an extreme shortage this year. Get your order in at once, please.

DESCRIPTION OF NEW VARIETIES FOR 1949

MARY McARTHUR

A pinkish bronze early high quality small Pompon. The flower resembles Mrs. Bulkeley in size, form and substances. It responds very well to black cloth shading and is very useful in the earliest shading, also grown as a garden variety in some sections.

MINSTREL

A large lavender Pompon of excellent substance. Easily the best Pompon in this color class for December and Christmas.

BRONZE MINUET

Bronze sport of Minuet.

GOLDEN ANNIVERSARY

A yellow Pompon about the size of Sunnyside that flowers for Christmas and later.

YULEFLAME

A large decorative yellow Pompon similar to Vibrant which blooms with the variety Revelation.

CHRISTMAS STAR

This variety was originally shown as Carnival at the National Mum Show. A scarlet red single flowering for Christmas.

DECORATIVE

POMPONS

DECORATIVE

A real money maker for you. Many retail florists who have available outside space for growing these, overlook this good paying item. It is usual that you more than double your money the first season and from there on, season after season the flowers cost you practically nothing. They are a good source, through the Summer and early Fall for plenty of cut flowers of all colors for many purposes.

We suggest early ordering. Varieties may be substituted unless you specify otherwise.

MINIATURE VARIETIES

Small class of Decorative intermediate sorts between Pompon and Ball types. Excellent for cutting.

Insect Destroyers, Fumigants, Fungicides, Damping Controls, Etc.

For Every Purpose in Greenhouse and Outdoors

Since florists must use insecticides, many of them harmful, we strongly recommend the use of masks and goggles in the greenhouse and to be careful not to get any dusts or solutions on hands with open cuts, etc. Your health is of first importance. And store them out of reach of children. Many florists are careless in this regard. "An ounce of prevention is worth a pound of cure."

SPREADERS

C.P.O. Increases the wetting and spreading qualities of most contact sprays such as Black Leaf 40, Red Arrow, Lethane, Loro and Selocide. The quantity of C.P.O. required varies from 1½ pints to 2½ pints of C.P.O. Liquid in 50 gallons of water. As water conditions (hardness) vary in different localities, growers should use just enough C.P.O. to produce a light suds. Most economical. Pt. 95c., qt. \$1.45, gal. \$3.65, case of 6 1-gal. \$18.00.

Grasselli (DuPont). Pt. \$1.00, gal. \$5.95, 5 gals. \$26.95.

Rooting Powders and Seedling Stimulants

HORMO-ROOT (The Latest) Highly Recommended

Hormo-Root "A" (New). For florists' general use. 2 ozs. \$1.00, ½ lb. \$2.75, lb. \$5.00.
Hormo-Root "B" (New). For evergreens. 2 ozs. \$1.25, ½ lb. \$3.50, lb. \$6.50.
Hormo-Root "C" (New). Strongest compound for hard-wood plants. 2 ozs. \$1.50, ½ lb. \$4.50, lb. \$8.00.
 Hormo-root powders are light and usually go further than other preparations. 1 lb. should treat 35,000 to 40,000 average cuttings.

HORMODIN

Hormodin Powder No. 1—A general purpose powder especially good for all soft wood cuttings. 1-lb. tin \$3.00.
Hormodin Powder No. 2—For woody and semi-woody types. 1-lb. tin \$4.50.
Hormodin Powder No. 3—For evergreens and dormant leafless cuttings. ½ lb. \$4.50.

FLOTE

Not a rooting powder. This is used only when you desire to make a wet solution of any rooting powder for dipping cuttings. Flote added to the solution keeps it in suspension, so that the last cuttings get the same amount of hormones as the first dipped. *It prevents settling.* 1½ oz. jar 85c.

ROOTING POWDER BLOWER

Jiffy Powder Blower or Duster. Makes dusting cuttings quick and easy. \$1.75.

PROLIFEROL

It not only induces rooting, but it also promotes vigorous growth due to natural elements, scientifically compounded and added to the mixture.

"Red Leaf" (Powder Form). For dusting seeds and cuttings. 2-oz. jar \$1.00, lb. \$5.00.

"Green Leaf." For soaking bulbs and tubers. Tests have shown (Callas) that healthy growth began immediately while those treated with Bichloride of Mercury, growth was retarded 4 to 6 weeks. Vials—8 capsules \$1.00, 50 capsules, \$5.00. One capsule makes 1 gal. solution which is sufficient to soak 100 medium size bulbs. Solutions should not be used over and over again as the first bulbs absorb all the nutrients.

ROOTONE

Rootone. Still a favorite. 3 ozs. \$1.00, lb. \$5.00.

SEEDLING STIMULANTS

Transplantone. The finest thing you can use when transplanting seedlings inside or outdoors. Relieves shock to seedlings. 3 ozs. \$1.00, lb. \$4.00.
